

(*Lepidium meyenii* or Peruvian ginseng)

MACA

MICROENCAPSULATED

✓ **ORIGIN**
Elaborated by **ANDES KINKUNA S.A. Ecuador.**

✓ **DESCRIPTION**
Powdered, microencapsulated Maca extract that enhances the bioavailability of its active components.

COMPONENTS

Maltodextrin

Powdered Maca extract

FUNCTION

Encapsulating agent

Alkaloid and glucosinolate contribution (energizing agents)

PROPERTIES

Maca powder is a product obtained from the maca plant extract. This extract contains natural alkaloids that act at the hypothalamus and adrenal glands level.

Maca

- According to several research investigations, maca is a completely natural product and has no contraindication.
- The maca root extract has a high concentration of minerals, such as copper and zinc, ideal for enhancing fertility and reproductive hormones.
- There is some evidence that the maca extract can help improve energy levels and positively affect a person's mood.

BENEFITS

The maca plant has alkaloids and glucosinolates that stimulate strength, physical endurance and sexual activity, producing a sense of wellness in general. Furthermore, it can benefit skin health, due to its effective healing properties while treating scars and wounds.

The maca powder extract has a great taste and can be consumed in many ways, such as shakes, mixed with fruit juice or just dissolved in water. Recommended only for adults over 40 years old.

PRODUCT SIZE

25 kg bag

HANDLING AND STORAGE

Keep in a dry environment (15-30 °C, humidity ≤ 65 %). Store bags over pallets.

TRANSPORTATION

Move the product in a clean and closed vehicle. The loads of bags should be placed in pallets, isolated from the floor. Does not require refrigeration and it must follow the recommended temperature and humidity conditions.
